AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Currently amended) A sanitary tissue product in roll form comprising a patterned wet laid or air laid fibrous structure comprising a random pattern of latex that exhibits a Tg of from about -65°C to about 100°C wherein the fibrous structure comprises a first surface and a second surface, wherein at least one of the first and second surfaces exhibits a deformation height of at least about 1000 µm wherein the sanitary tissue product exhibits an average effective caliper that is greater than the average sheet caliper of an identical sanitary tissue product in its non-patterned form.

Claims 2-4 (Cancelled)

Claim 5 (Previously presented) The sanitary tissue product according to Claim 1 wherein the latex is a natural and/or synthetic latex.

Claim 6 (Cancelled)

Claim 7 (Previously presented) The sanitary tissue product according to Claim 5 wherein the latex is a synthetic latex selected from the group consisting of vinyl acetates, ethylene-vinyl acetate copolymers, acrylate copolymers, styrene butadiene copolymers and mixtures thereof.

Claim 8 (Previously presented) The sanitary tissue product according to Claim 1 wherein the fibrous structure exhibits substantially uniform density.

Appl. No. 10/840,042

Customer No. 27752

Claim 9 (Previously presented) The sanitary tissue product according to Claim 1 wherein the fibrous structure exhibits regions of high and low density relative to each other.

Claim 10 (Previously presented) The sanitary tissue product according to Claim 9 wherein the latex is substantially present in the high density regions of the fibrous structure.

Claim 11 (Previously presented) The sanitary tissue product according to Claim 1 wherein one of the first and second surfaces exhibits a deformation height of at least about 1000 μm and the other surface exhibits a deformation height of at least about 650 μm .

Claim 12 (Previously presented) The sanitary tissue product according to Claim 1 wherein the fibrous structure exhibits an HFS absorbency of greater than about 8 g/g.

Claim 13 (Previously presented) The sanitary tissue product according to Claim 1 wherein the fibrous structure exhibits a Stretch at Peak Load, in any direction, of greater than about 10%.

Claim 14 (Previously presented) The sanitary tissue product according to Claim 1 wherein the fibrous structure exhibits a sheet caliper of at least about 20 mils.

Claim 15 (Previously presented) The sanitary tissue product according to Claim 1 wherein the fibrous structure exhibits a wet burst of at least about 100 g.

Claims 16-28 (Cancelled)
